CUMULATIVE KEY WORD INDEX—VOLUME 44, 1996

Abnormal elastolysis

Therapeutic potential of neutrophil-elastase inhibition in pulmonary disease; 44(9):531-539.

Acetaldehyde

Distribution of messenger RNAs for aldehyde dehydrogenase 1, aldehyde dehydrogenase 2, and aldehyde dehydrogenase 5 in human tissues. 44(2):42-6.

Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hypertension in alcoholics, A. 44(2):36-41.

Acid-base imbalance

Effects of Carbicarb® and sodium bicarbonate on hypoxic lactic acidosis in newborn pigs. 44(2):70-4.

Adenomatous polyp

Colorectal cancer: the role of screening and surveillance. 44(5):216-27.

Adenosine

Biochemical perspective of methotrexate neurotoxicity with insight on nonfolate rescue modalities, A. 44(9):522-74.

Adherence

Amebiasis and the *Entamoeba histolytica* Gal/GalNAc lectin: from lab bench to bedside. 44(2):24-35.

Adrenergic receptor

Evidence for the involvement of protein kinase C isoforms in α -1 adrenergic activation of phospholipase A_2 in FRTL-5 thyroid cells. 44(9):566-574.

Afferent

Cardiac reflex effects of intracoronary bradykinin in humans. 44(4):160-7.

AIDS and cancer

Spectrum of non-AIDS-defining neoplastic disease in HIV infection. 44(5):205-15.

AIDS and cancer

Colorectal cancer: the role of screening and surveillance. 44(5):216-27.

Albumin promoter

Viability of transgenic mice expressing a platelet derived growth factor antagonist in plasma. 44(4):139-43.

Alcohol

Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hypertension in alcoholics, A. 44(2):36-41.

Alcoholism

Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hyper-

tension in alcoholics, A. 44(2):36-41.

Aldehyde dehydrogenase

Distribution of messenger RNAs for aldehyde dehydrogenase 1, aldehyde dehydrogenase 2, and aldehyde dehydrogenase 5 in human tissues. 44(2):42-6.

Amebiasis

Amebiasis and the *Entamoeba histolytica* Gal/GalNAc lectin: from lab bench to bedside. 44(2):24-35.

Amiloride

Thermotolerance attenuates heat-induced increases in $[Ca^{2+}]_i$ and HSP-72 synthesis but not heat-induced intracellular acidification in human A-431 cells. 44(2):53-63.

Animal models

Protective and pathogenic roles of cytokines in inflammatory bowel disease; 44(9):516-21.

Amino acid

Acute effects of TNF- α on the isolated perfused rat liver, The. 44(2):64-9.

Platelet inhibitory effect of nitroglycerin in platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):561-5.

Amiodarone

Mechanisms of amiodarone-induced inhibition of Ca^{2+} current in isolated neonatal rabbit ventricular myocytes. 44(9):583-9.

Ammonia

Effects of tumor necrosis factor- α and interleukin-6 on fluid-phase permeability and ammonia diffusion in CNS-derived endothelial cells. 44(8):474-82.

Anemia

Effects of hemodilution with polyethylene glycol bovine hemoglobin in a conscious porcine model, The. 44(5):238-46.

Angina

Cardiac reflex effects of intracoronary bradykinin in humans. 44(4):160-7.

Angiotensin II

Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hypertension in alcoholics, A. 44(2):36-41.

Antiarrhythmic therapy

Mechanisms of amiodarone-induced inhibition of Ca^{2+} current in isolated neonatal rabbit ventricular myocytes. 44(9):583-9.

Arachidonic acid

Evidence for the involvement of protein

kinase C isoforms in α -1 adrenergic activation of phospholipase A_2 in FRTL-5 thyroid cells. 44(9):566-74.

ATF-2

Role of kinases in HTLV-I transformation. 44(4):113-23.

ATL

Role of kinases in HTLV-I transformation. 44(4):113-23.

Atrial natriuretic peptide

Altered circadian blood pressure rhythm and progression of diabetic nephropathy in non-insulin dependent diabetes mellitus subjects: a three year follow-up study. 44(5):247-53.

Bacterial overgrowth

Alteration of bile acid metabolism by cimetidine in healthy humans. 44(8):462-9.

Basic science research

Is clinical subspecialty training necessary to become a physician-scientist? 44(4):136-8.

Basic science training

Is clinical subspecialty training necessary to become a physician-scientist? 44(4):136-8.

beige

Positional cloning of the Chediak-Higashi syndrome gene: genetic mapping of the beige locus on mouse chromosome 13. 44(8):454-61.

β Fibrinogen

Variant of β fibrinogen is a genetic risk factor for coronary artery disease and myocardial infarction, A. 44(4):154-9.

Betaine

Platelet inhibitory effect of nitroglycerin in platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):561-5.

Bile acid breath test

Alteration of bile acid metabolism by cimetidine in healthy humans. 44(8):462-9.

Biopterins

Biochemical perspective of methotrexate neurotoxicity with insight on nonfolate rescue modalities, A. 44(9):522-30.

Blood-brain barrier

Effects of tumor necrosis factor- α and interleukin-6 on fluid-phase permeability and ammonia diffusion in CNS-derived

endothelial cells. 44(8):474-82.

Blood gases

Effects of hemodilution with polyethylene glycol bovine hemoglobin in a conscious porcine model. The. 44(5):238-46.

Bone marrow transplantation

Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells of mechanical ventilation for adults with hematologic malignancy. 44(5):254-60.

Bradykinin

Cardiac reflex effects of intracoronary bradykinin in humans. 44(4):160-7.

Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells. 44(6):352-61.

Ca²⁺

Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells. 44(6):352-61.

Ca²⁺ current

Mechanisms of amiodarone-induced inhibition of Ca²⁺ current in isolated neonatal rabbit ventricular myocytes. 44(9):583-9.

Calcium

Thermotolerance attenuates Heat-induced increases in [Ca²⁺]_i and HSP-72 synthesis but not heat-induced intracellular acidification in human A-431 cells. 44(2):53-63. Increases in HSF1 translocation and synthesis in human epidermoid A-431 cells: role of protein kinase C and [Ca²⁺]_i. 44(4):144-53.

Calcium protein kinase C

Evidence for the involvement of protein kinase C isoforms in α -1 adrenergic activation of phospholipase A₂ in FRTL-5 thyroid cells. 44(9):566-74.

Cancer

Paramagnetic resonance in detecting carcinogenic risk from cytochrome P450 overexpression. 44(8):470-3.

CD59

Amebiasis and the *Entamoeba histolytica* Gal/GalNAc lectin: from lab bench to bedside. 44(2):24-35.

Cellular adhesion molecules

Cellular adhesion molecules in rheumatoid arthritis: regulation by cytokines and possible clinical importance. 44(4):124-35.

Cell adhesion

Fibronectin and integrins interactions. 44(8):429-41.

Cerebrovascular and systemic

vasoconstriction

Effects of continuous infusion fentanyl citrate on cerebrovascular and systemic prostanooids in postsurgical newborn piglets. 44(6):362-9.

Chediak Higashi syndrome

Positional cloning of the Chediak-Higashi syndrome gene: genetic mapping of the beige locus on mouse chromosome 13. 44(8):454-61.

Chemokine

Peptide nucleic acids stimulate gamma interferon and inhibit the replication of the human immunodeficiency virus. 44(6):347-51.

Cimetidine

Alteration of bile acid metabolism by cimetidine in healthy humans. 44(8):462-9.

Circadian blood pressure rhythm

Altered circadian blood pressure rhythm and progression of diabetic nephropathy in non-insulin dependent diabetes mellitus subjects: a three year follow-up study. 44(5):247-53.

CNS-endothelial cells

Effects of tumor necrosis factor- α and interleukin-6 on fluid-phase permeability and ammonia diffusion in CNS-derived endothelial cells. 44(8):474-82.

Collagen

Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hypertension in alcoholics. A. 44(2):36-41.

Common cytokine receptor gamma chain (γ_c)

Dysfunctional cytokine receptor signaling in severe combined immunodeficiency. 44(6):304-11.

Complement receptor

Role of mononuclear phagocytes in *M. tuberculosis* pathogenesis. 44(6):312-23.

Complement resistance

Amebiasis and the *Entamoeba histolytica* Gal/GalNAc lectin: from lab bench to bedside. 44(2):24-35.

Coronary artery disease

Variant of β fibrinogen is a genetic risk factor for coronary artery disease and myocardial infarction. A. 44(4):154-9.

Cytochrome P450

Paramagnetic resonance in detecting carcinogenic risk from cytochrome P450 overexpression. 44(8):470-3.

Cytokine

Cytokine inhibition preserves renal hemodynamic function following mesangial cell immune injury. 44(6):375-81.

Effects of tumor necrosis factor- α and interleukin-6 on fluid-phase permeability and ammonia diffusion in CNS-derived endothelial cells. 44(8):474-82.

Cellular adhesion molecules in rheumatoid arthritis: regulation by cytokines and possible clinical importance. 44(4):124-35.

Protective and pathogenic roles of cytokines in inflammatory bowel disease; 44(9):516-21.

Cytotoxicity

Amebiasis and the *Entamoeba histolytica* Gal/GalNAc lectin: from lab bench to bedside. 44(2):24-35.

Diabetes mellitus

Altered circadian blood pressure rhythm and progression of diabetic nephropathy in non-insulin dependent diabetes mellitus subjects: a three year follow-up study. 44(5):247-53.

Differentiation

Molecular mechanism of action of granulocyte-macrophage colony-stimulating factor. The. 44(8):442-6.

Elastase-induced lung disease

Therapeutic potential of neutrophil-elastase inhibition in pulmonary disease; 44(9):531-9.

Epithelia

Increases in HSF1 translocation and synthesis in human epidermoid A-431 cells: role of protein kinase C and [Ca²⁺]_i. 44(4):144-53.

EPR

Paramagnetic resonance in detecting carcinogenic risk from cytochrome P450 overexpression. 44(8):470-3.

Endothelin

Cardiac endothelin release and infarct size, myocardial blood flow, and ventricular function in canine infarction and reperfusion. 44(9):575-82.

Endothelin-1

Endothelin-1 stimulates the proliferation

- and invasion of first trimester trophoblastic cells in vitro—a possible role in the etiology of pre-eclampsia? 44(8):447-53.
- Endothelium**
- Insulin and the vasculature—old actors, new roles. 44(8):406-12.
- Entamoeba histolytica**
- Amebiasis and the *Entamoeba histolytica* Gal/GalNAc lectin: from lab bench to bedside. 44(2):24-35.
- Epidemiology AIDS cancer**
- Spectrum of non-AIDS-defining neoplastic disease in HIV infection, The. 44(5):205-15.
- Excitatory**
- Platelet inhibitory effect of nitroglycerin in platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):561-5.
- Fentanyl**
- Effects of continuous infusion fentanyl citrate on cerebrovascular and systemic prostanooids in postsurgical newborn piglets. 44(6):362-9.
- Fibronectin**
- Fibronectin and Integrins Interactions. 44(8):429-41.
- Fibrosis**
- Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hypertension in alcoholics, A. 44(2):36-41.
- Five-year follow-up**
- Metabolic characterization of long-term successful pancreas transplants in type I diabetes. 44(9):549-55.
- Gamma interferon**
- Peptide nucleic acids stimulate gamma interferon and inhibit the replication of the human immunodeficiency virus. 44(6):347-51.
- Gastric pH**
- Alteration of bile acid metabolism by cimetidine in healthy humans. 44(8):462-9.
- Gene expression**
- Distribution of messenger RNAs for aldehyde dehydrogenase 1, aldehyde dehydrogenase 2, and aldehyde dehydrogenase 5 in human tissues. 44(2):42-6.
- General internist**
- Is clinical subspecialty training necessary to become a physician-scientist? 44(4):136-8.
- Genetic alteration**
- Colorectal cancer: the role of screening and surveillance. 44(5):216-27.
- Genetics**
- Variant of β fibrinogen is a genetic risk factor for coronary artery disease and myocardial infarction, A. 44(4):154-9.
- Positional cloning of the Chediak-Higashi syndrome gene: genetic mapping of the beige locus on mouse chromosome 13. 44(8):454-61.
- Glucose clamp**
- Insulin and the vasculature—old actors, new roles. 44(8):406-12.
- Glutathione**
- Acute Effects of TNF- α on the isolated perfused rat liver, The. 44(2):64-9.
- Glycine-1-¹⁴C labeled glycocholate**
- Alteration of bile acid metabolism by cimetidine in healthy humans. 44(8):462-9.
- Glutathione-S-transferases**
- Platelet inhibitory effect of nitroglycerin in platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):000-000.
- Granulocyte-Macrophage-CSF**
- Molecular mechanism of action of granulocyte-macrophage colony-stimulating factor, The. 44(8):442-6.
- Growth factor receptor**
- Viability of transgenic mice expressing a platelet derived growth factor antagonist in plasma. 44(2):139-43.
- Healthy human**
- Alteration of bile acid metabolism by cimetidine in healthy humans. 44(8):462-9.
- Heart cell**
- Mechanisms of amiodarone-induced inhibition of Ca^{2+} current in isolated neonatal rabbit ventricular myocytes. 44(9):583-9.
- Heat shock factor**
- Increases in HSF1 translocation and synthesis in human epidermoid A-431 cells: role of protein kinase C and $[Ca^{2+}]_i$. 44(4):144-53.
- Heat shock protein**
- Thermotolerance attenuates heat-induced increases in $[Ca^{2+}]_i$ and HSP-72 synthesis but not heat-induced intracellular acidification in human A-431 cells. 44(2):53-63.
- Increases in HSF1 translocation and synthesis in human epidermoid A-431 cells: role of protein kinase C and $[Ca^{2+}]_i$. 44(4):144-53.
- Hematologic diseases**
- Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells of mechanical ventilation for adults with hematologic malignancy. 44(5):254-60.
- Hemodilution**
- Effects of hemodilution with polyethylene glycol bovine hemoglobin in a conscious porcine model, The. 44(5):238-46.
- Histology**
- Effects of hemodilution with polyethylene glycol bovine hemoglobin in a conscious porcine model, The. 44(5):238-46.
- HLA class II**
- Influence of the HLA-DRB1*13 allele on measles vaccine response, The. 44(5):261-3.
- HLA-DR**
- Influence of the HLA-DRB1*13 allele on measles vaccine response, The. 44(5):261-3.
- Homocysteine**
- Platelet inhibitory effect of nitroglycerin in platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):000-000.
- HNPCC**
- Colorectal cancer: the role of screening and surveillance. 44(5):216-27.
- HTLV-I**
- Role of kinases in HTLV-I transformation. 44(4):113-23.
- Human immunodeficiency virus**
- Peptide nucleic acids stimulate gamma interferon and inhibit the replication of the human immunodeficiency virus. 44(6):347-51.
- Hyaluronan**
- Hyaluronan is exocytosed from serous, but not mucous cells, of human nasal and tracheobronchial submucosal glands. 44(2):47-52.
- Hypertension**
- Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hypertension in alcoholics, A. 44(2):36-41.

Hypothalamus

Leptin, its receptor and obesity. 44(9):540-8.

Hypoxia

Effects of Carbicarb® and sodium bicarbonate on hypoxic lactic acidosis in newborn pigs. 44(2):70-4.

Immune deficiency

Positional cloning of the Chediak-Higashi syndrome gene: genetic mapping of the beige locus on mouse chromosome 13. 44(8):454-61.

Inflammation

Cellular adhesion molecules in rheumatoid arthritis: regulation by cytokines and possible clinical importance. 44(4):124-35.

Inflammatory bowel disease

Protective and pathogenic roles of cytokines in inflammatory bowel disease; 44(9):516-21.

Inositol 1,4,5-triphosphate

Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells. 44(6):352-61.

Effects of low density lipoprotein on cultured rat mesangial cell intracellular [CA⁺⁺] and pH. 44(9):556-60.

Insulin resistance

Insulin and the vasculature—old actors, new roles. 44(8):406-12.

Integrin receptor

Fibronectin and Integrins Interactions. 44(8):429-41.

Interleukin-2 receptor

Dysfunctional cytokine receptor signaling in severe combined immunodeficiency. 44(6):304-11.

Interleukin-6

Role of kinases in HTLV-I transformation. 44(4):113-23.

Peptide nucleic acids stimulate gamma interferon and inhibit the replication of the human immunodeficiency virus. 44(6):347-51.

Lack of increased serum interleukin-6 and soluble IL-6 receptor concentrations in patients with thyroid diseases following recombinant human interferon α therapy. 44(6):370-4.

Intracellular calcium

Effects of low density lipoprotein on cul-

tured rat mesangial cell intracellular [CA⁺⁺] and pH. 44(9):556-60.

Intracellular pathogen

Role of mononuclear phagocytes in *M tuberculosis* pathogenesis. 44(6):312-23.

Intracellular pH

Platelet inhibitory effect of nitroglycerin in platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):561-5.

Intracellular signals

Effects of low density lipoprotein on cultured rat mesangial cell intracellular [CA⁺⁺] and pH. 44(9):561-5.

Intratracheal intubation

Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells of mechanical ventilation for adults with hematologic malignancy. 44(5):254-60.

Invasion

Endothelin-1 stimulates the proliferation and invasion of first trimester trophoblastic cells in vitro—a possible role in the etiology of pre-eclampsia? 44(8):447-53.

Ionomycin

Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells. 44(6):352-61.

Ischemia

Cardiac endothelin release and infarct size, myocardial blood flow, and ventricular function in canine infarction and reperfusion. 44(9):575-2.

Isolated rat liver

Acute Effects of TNF- α on the isolated perfused rat liver. The. 44(2):64-9.

JAK

Role of kinases in HTLV-I transformation. 44(4):113-23.

JAK kinases

Dysfunctional cytokine receptor signaling in severe combined immunodeficiency. 44(6):304-11.

Jejunum

Alteration of bile acid metabolism by cimetidine in healthy humans. 44(8):462-9.

JNK

Role of kinases in HTLV-I transformation. 44(4):113-23.

Kinases

Role of kinases in HTLV-I transformation.

44(4):113-23.

Lactic Acidosis

Effects of Carbicarb® and sodium bicarbonate on hypoxic lactic acidosis in newborn pigs. 44(2):70-4.

Lectin

Amebiasis and the *Entamoeba histolytica* Gal/GalNAc lectin: from lab bench to bedside. 44(2):24-35.

Liver

Distribution of messenger RNAs for aldehyde dehydrogenase 1, aldehyde dehydrogenase 2, and aldehyde dehydrogenase 5 in human tissues. 44(2):42-6.

low density lipoproteins

Effects of low density lipoprotein on cultured rat mesangial cell intracellular [CA⁺⁺] and pH. 44(9):556-60.

Lung cancer-HIV

Spectrum of non-AIDS-defining neoplastic disease in HIV infection. The. 44(5):205-15.

Lysyl oxidase

Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hypertension in alcoholics. A. 44(2):36-41.

Macrophages

Role of mononuclear phagocytes in *M tuberculosis* pathogenesis. 44(6):312-23.
Protective and pathogenic roles of cytokines in inflammatory bowel disease; 44(9):516-21.

Macrovascular disease

Insulin and the vasculature—old actors, new roles. 44(8):406-12.

MAP kinase

Role of kinases in HTLV-I transformation. 44(4):113-23.

Measles vaccine

Influence of the HLA-DRB1*13 allele on measles vaccine response. The. 44(5):261-3.

Medical educator

Is clinical subspecialty training necessary to become a physician-scientist? 44(4):136-8.

Mesangial cell

Cytokine inhibition preserves renal hemodynamic function following mesangial cell immune injury. 44(6):375-81.
Effects of low density lipoprotein on cultured rat mesangial cell intracellular

[CA²⁺] and pH. 44(9):556-60.

Metabolic stability

Metabolic characterization of long-term successful pancreas transplants in type I diabetes. 44(9):549-55.

Microalbuminuria

Altered circadian blood pressure rhythm and progression of diabetic nephropathy in non-insulin dependent diabetes mellitus subjects: a three year follow-up study. 44(5):247-53.

Monocyte

Role of mononuclear phagocytes in *M tuberculosis* pathogenesis. 44(6):312-23.

Monoensin

Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells. 44(6):352-61.

Mucus

Hyaluronan is exocytosed from serous, but not mucous cells, of human nasal and tracheobronchial submucosal glands. 44(2):47-52.

Myeloid cells

Molecular mechanism of action of granulocyte-macrophage colony-stimulating factor, The. 44(8):442-6.

Myocardial infarction

Cardiac endothelin release and infarct size, myocardial blood flow, and ventricular function in canine infarction and reperfusion. 44(9):575-82.

Myocardial ischemia

Cardiac reflex effects of intracoronary bradykinin in humans. 44(4):160-7.

Nephritis

Cytokine inhibition preserves renal hemodynamic function following mesangial cell immune injury. 44(6):375-81.

Neuropeptide-Y

Leptin, its receptor and obesity. 44(9):540-8.

Neutrophil elastase

Therapeutic potential of neutrophil-elastase inhibition in pulmonary disease; 44(9):531-9.

Newborn

Effects of Carbicarb® and sodium bicarbonate on hypoxic lactic acidosis in newborn pigs. 44(2):70-4.

Nitroglycerin

Platelet inhibitory effect of nitroglycerin in

platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):561-5.

Nitric oxide

Platelet inhibitory effect of nitroglycerin in platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):561-5.

Insulin and the vasculature—old actors, new roles. 44(8):406-12.

Norepinephrine

Evidence for the involvement of protein kinase C isoforms in α -1 adrenergic activation of phospholipase A₂ in FRTL-5 thyroid cells. 44(9):566-74.

Northern blot

Distribution of messenger RNAs for aldehyde dehydrogenase 1, aldehyde dehydrogenase 2, and aldehyde dehydrogenase 5 in human tissues. 44(2):42-6.

Obesity

Leptin, its receptor and obesity. 44(9):540-8.

Ob gene

Leptin, its receptor and obesity. 44(9):540-8.

Ob-receptor

Leptin, its receptor and obesity. 44(9):540-8.

Outcome assessment

Outcome of mechanical ventilation for adults with hematologic malignancy. 44(5):254-60.

Oxidative stress

Paramagnetic resonance in detecting carcinogenic risk from cytochrome P450 overexpression. 44(8):470-3.

Pancreas transplant

Metabolic characterization of long-term successful pancreas transplants in type I diabetes. 44(9):549-55.

Pathogenesis

Role of mononuclear phagocytes in *M tuberculosis* pathogenesis. 44(6):312-23.

Pathogenesis AIDS cancer

Spectrum of non-AIDS-defining neoplastic disease in HIV infection, The. 44(5):205-15.

PDGF antagonist

Viability of transgenic mice expressing a platelet derived growth factor antagonist in plasma. 44(2):139-43.

PDGF receptor

Viability of transgenic mice expressing a platelet derived growth factor antagonist in plasma. 44(2):139-43.

PEG-hemoglobin

Effects of hemodilution with polyethylene glycol bovine hemoglobin in a conscious porcine model, The. 44(5):235-46.

Peptide nucleic acid

Peptide nucleic acids stimulate gamma interferon and inhibit the replication of the human immunodeficiency virus. 44(6):347-51.

Permeability

Effects of tumor necrosis factor- α and interleukin-6 on fluid-phase permeability and ammonia diffusion in CNS-derived endothelial cells. 44(8):474-82.

pH

Thermotolerance attenuates heat-induced increases in [Ca²⁺]_i and HSP-72 synthesis but not heat-induced intracellular acidification in human A-431 cells. 44(2):53-63.

Phagosome

Role of mononuclear phagocytes in *M tuberculosis* pathogenesis. 44(6):312-23.

Phospholipase A₂

Evidence for the involvement of protein kinase C isoforms in α -1 adrenergic activation of phospholipase A₂ in FRTL-5 thyroid cells. 44(9):566-74.

Phospholipase C

Evidence for the involvement of protein kinase C isoforms in α -1 adrenergic activation of phospholipase A₂ in FRTL-5 thyroid cells. 44(9):566-74.

Physician-scientist

Is clinical subspecialty training necessary to become a physician-scientist? 44(4):136-8.

Placenta

Endothelin-1 stimulates the proliferation and invasion of first trimester trophoblastic cells in vitro—a possible role in the etiology of pre-eclampsia? 44(8):447-53.

Platelet

Platelet inhibitory effect of nitroglycerin in platelet-rich plasma: relevance of glutathione-S-transferases in plasma. 44(9):561-5.

Polyposis syndrome

Colorectal cancer: the role of screening

- and surveillance. 44(5):216-27.
- Polyamide**
Peptide nucleic acids stimulate gamma interferon and inhibit the replication of the human immunodeficiency virus. 44(6):347-51.
- Postsurgical newborns**
Effects of continuous infusion fentanyl citrate on cerebrovascular and systemic prostanooids in postsurgical newborn piglets. 44(6):362-9.
- Proliferation**
Endothelin-1 stimulates the proliferation and invasion of first trimester trophoblastic cells in vitro—a possible role in the etiology of pre-eclampsia? 44(8):447-53.
Molecular mechanism of action of granulocyte-macrophage colony-stimulating factor, The. 44(8):442-6.
- Prostanoids**
Effects of continuous infusion fentanyl citrate on cerebrovascular and systemic prostanooids in postsurgical newborn piglets. 44(6):362-9.
- Protease: antiprotease imbalance**
Therapeutic potential of neutrophil-elastase inhibition in pulmonary disease; 44(9):531-9.
- Protein kinase C**
Increases in HSF1 translocation and synthesis in human epidermoid A-431 cells: role of protein kinase C and $[Ca^{2+}]_i$. 44(4):144-53.
- Proteolytic enzymes**
Therapeutic potential of neutrophil-elastase inhibition in pulmonary disease; 44(9):531-9.
- rIFN- α**
Lack of increased serum interleukin-6 and soluble IL-6 receptor concentrations in patients with thyroid diseases following recombinant human interferon α therapy. 44(6):370-4.
- Receptor**
Molecular mechanism of action of granulocyte-macrophage colony-stimulating factor, The. 44(8):442-6.
- Reflex**
Cardiac reflex effects of intracoronary bradykinin in humans. 44(4):160-7.
- Renin-aldosterone system**
Altered circadian blood pressure rhythm and progression of diabetic nephropathy in non-insulin dependent diabetes mellitus subjects: a three year follow-up study. 44(5):247-53.
- Reperfusion**
Cardiac endothelin release and infarct size, myocardial blood flow, and ventricular function in canine infarction and reperfusion. 44(9):575-82.
- Retrovirus**
Role of kinases in HTLV-I transformation. 44(4):113-23.
- Rheumatoid arthritis**
Cellular adhesion molecules in rheumatoid arthritis: regulation by cytokines and possible clinical importance. 44(4):124-35.
- Risk factor**
Variant of β fibrinogen is a genetic risk factor for coronary artery disease and myocardial infarction, A. 44(4):154-9.
Colorectal cancer: the role of screening and surveillance. 44(5):216-27.
- Ryanodine**
Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells. 44(6):352-61.
- Secretion**
Hyaluronan is exocytosed from serous, but not mucous cells, of human nasal and tracheobronchial submucosal glands. 44(2):47-52.
- Serous cells**
Hyaluronan is exocytosed from serous, but not mucous cells, of human nasal and tracheobronchial submucosal glands. 44(2):47-52.
- Severe combined immunodeficiency disease**
Dysfunctional cytokine receptor signaling in severe combined immunodeficiency. 44(6):304-11.
- Signal transduction**
Molecular mechanism of action of granulocyte-macrophage colony-stimulating factor, The. 44(8):442-6.
- sIL-6R**
Lack of increased serum interleukin-6 and soluble IL-6 receptor concentrations in patients with thyroid diseases following recombinant human interferon α therapy. 44(6):370-4.
- Sporadic colon cancer**
Colorectal cancer: the role of screening and surveillance. 44(5):216-27.
- Submucosal glands**
Hyaluronan is exocytosed from serous, but not mucous cells, of human nasal and tracheobronchial submucosal glands. 44(2):47-52.
- Superoxide**
Paramagnetic resonance in detecting carcinogenic risk from cytochrome P450 overexpression. 44(8):470-3.
- T cells**
Protective and pathogenic roles of cytokines in inflammatory bowel disease; 44(9):516-21.
- Testicular cancer-HIV**
Spectrum of non-AIDS-defining neoplastic disease in HIV infection, The. 44(5):205-15.
- Therapy**
Protective and pathogenic roles of cytokines in inflammatory bowel disease; 44(9):516-21.
- Thermotolerance**
Thermotolerance attenuates heat-induced increases in $[Ca^{2+}]_i$ and HSP-72 synthesis but not heat-induced intracellular acidification in human A-431 cells. 44(2):53-63.
Characterization of intracellular calcium pools and their desensitization in thermotolerant human A-431 cells. 44(6):352-61.
- Three-year follow-up study**
Altered circadian blood pressure rhythm and progression of diabetic nephropathy in non-insulin dependent diabetes mellitus subjects: a three year follow-up study. 44(5):247-53.
- TNF- α**
Acute effects of TNF- α on the isolated perfused rat liver, The. 44(2):64-9.
Cytokine inhibition preserves renal hemodynamic function following mesangial cell immune injury. 44(6):375-81.
- Transgenic mice**
Viability of transgenic mice expressing a platelet derived growth factor antagonist in plasma. 44(2):139-43.
- Transforming growth factor- β**
Proposed sequence of reactions leading to collagen biosynthesis, fibrosis, and hypertension in alcoholics, A. 44(2):36-41.
- Trophoblast**
Endothelin-1 stimulates the proliferation

and invasion of first trimester trophoblastic cells in vitro—a possible role in the etiology of pre-eclampsia? 44(8):447-53.

Tuberculosis

Role of mononuclear phagocytes in *M tuberculosis* pathogenesis. 44(6):312-23.

Type I diabetes

Metabolic characterization of long-term successful pancreas transplants in type I

diabetes. 44(9):549-55.

Thyroiditis

Lack of increased serum interleukin-6 and soluble IL-6 receptor concentrations in patients with thyroid diseases following recombinant human interferon α therapy. 44(6):370-4.

Vasodilation

Insulin and the vasculature—old actors,

new roles. 44(8):406-12.

Voltage clamp

Mechanisms of amiodarone-induced inhibition of Ca^{2+} current in isolated neonatal rabbit ventricular myocytes. 44(9):583-9.

X-linked SCID

Dysfunctional cytokine receptor signaling in severe combined immunodeficiency. 44(6):304-11.
